

Eggshell meal (0-0-0-35% Ca)								
Description	<p><i>Les entreprises A. Jr. L Inc.'s eggshell meal is 100% natural as it comes from animal sources. Eggshells are an effective but slow-release source of calcium, supplementing the nitrogen, phosphorus, and potassium needs of plants when necessary. The meal can be used to meet the calcium requirements of solanaceous plants such as tomatoes and peppers or as an amendment to increase the pH of your soils. It works well in combination with Les entreprises A. Jr. L Inc.'s homemade mixed fertilizer for comprehensive plant fertilization. It is approved for organic production by Écocert..</i></p>				45 ml equals 30 grams	19kg/pi3= 671 kg/m3		
Crop		Time of application	Method of application	Dosage				
Annual/Perennial plants	New planting	Early spring or autumn	Mix well into the soil	45 ml/m2 (3 tablespoons/10 pi2)	105 Ca			
Trees and shrubs	First-year tree	Early spring or autumn	Mix well into the soil	45 ml/m2 (3 tablespoons/10 pi2)	105 Ca			
	Trees (2+ years old)	Early spring or autumn	Mix well into the soil	45 ml/m2 (3 tablespoons/10 pi2)	105 Ca			
Vegetables	Before planting	Early spring	Mix well into the soil	45 ml/m2 (3 tablespoons/10 pi2)	105 Ca			
Roses	New planting	Early spring or autumn	Mix well into the soil	45 ml/m2 (3 tablespoons/10 pi2)	105 Ca			
Caution and Warning								
Wash your hands thoroughly after use. Do not use it within 3 meters of lakes and rivers. Keep tightly closed and store in a dry place.
