

Mixed Fertilizer (8,5-4-8)						
Description	<i>Les Entreprises A. Jr. L Inc.'s mixed fertilizer for vegetables is 100% natural as it comes from organic sources. The combination of blood meal, feather meal, bone meal, and potassium sulfate promotes the continuous growth and development of plants and seedlings by fulfilling all the needs of the crops. Nitrogen, released throughout the season, will support sustained growth, while phosphorus and potassium aid in root development and flowering. The meal works well in combination with Les Entreprises A. Jr. L Inc.'s eggshell fertilizer or, for nitrogen-demanding vegetables, with the nitrogen plus blood meal product, for comprehensive fertilization. It is approved for organic production by Écocert.</i>				I took the same density as blood meal (671 kg/m3)	45 ml = 30 gr
Crop		Time of application	Method of application	Dosage		
Vegetables	Nitrogen-demanding (cabbage/tomato/pepper/corn/cucumber/potato family)	Spring	Mix well into the soil	45 ml/m2 (3 tablespoons/10 pi2)	26N-12P-24k	
		Mid-June		45 ml/m2 (3 tablespoons/10 pi2)	26N-12P-24k	
		Mid-July		45 ml/m2 (3 tablespoons/10 pi2)	26N-12P-24k	
	Other vegetables	Spring	Mix well into the soil	60 ml/m2 (4 tablespoons/10 pi2)	34N-16P-32k	
Caution and Warning						
Wash your hands thoroughly after use. Do not use it within 3 meters of lakes and rivers. Keep tightly closed and store in a dry place.
